

KHUN PHO LON

Electrical Site Engineer | 11kV/0.4kV Distribution | Solar PV & Testing

Mae Sot, Thailand | Available to relocate to Singapore | Work authorisation: Requires employer-sponsored S Pass
+65 8283 0596 (WhatsApp) | khunpholon.work@gmail.com | linkedin.com/in/khunpholon

PROFESSIONAL PROFILE

Electrical Site Engineer with 7+ years of hands-on experience in electrical installation, site execution, inspection, testing and handover. Delivered and supported 15 rural electrification projects and approximately 20 small-scale off-grid Solar PV installations. Experienced in 11kV/0.4kV distribution, pole-mounted transformers, distribution panels, cabling, earthing, troubleshooting, QC coordination and technician/subcontractor supervision. Skilled in BOQs, material calculations, AutoCAD 2D, method statements, progress reporting, testing records and handover documentation. Available for Electrical Site Engineer, Electrical Project Engineer, Testing & Commissioning Engineer, Electrical Maintenance Engineer or Solar PV Site Engineer opportunities in Singapore.

CORE TECHNICAL SKILLS

Solar PV

PV module installation; inverter and battery installation; DC/AC cabling; PV string connection; testing; commissioning; troubleshooting; maintenance.

Electrical Distribution

11kV/0.4kV systems; pole-mounted transformers; distribution panels; circuit breakers; cable installation; earthing; lighting and power.

Testing & Measurement

Insulation resistance; continuity; earth resistance; voltage testing; multimeter; clamp meter; Megger.

Engineering & Documentation

BOQ; cost estimation; material quantity calculation; AutoCAD 2D; electrical drawings; as-built drawings; method statements; progress and handover documentation.

Site / Team Support

Installation supervision; technician/subcontractor coordination; site surveys; QC coordination; site inspection; tender and quotation preparation.

PROFESSIONAL EXPERIENCE

Aug 2023 – May 2026

Electrical Engineer

MEGA UNIQUE COMPANY LIMITED — Myanmar

- Supported approximately 20 small-scale off-grid Solar PV installations for residential and commercial applications.
- Performed hands-on PV module mounting, inverter and battery installation, DC/AC cabling, PV string connections, distribution-panel installation, earthing, testing, commissioning support, troubleshooting and maintenance.
- Supported electrical works involving DB/panel installation, lighting, power systems, pumps, motors and generators.
- Prepared BOQs, material quantity calculations, AutoCAD 2D drawings and as-built documentation; supported site coordination and installation supervision.

Apr 2023 – Jul 2023

Engineer

COMET M & E COMPANY LIMITED — Myanmar

Project: POSCO International – Shwe Onshore Gas Terminal.

- Supported senior engineers on infrastructure works at a live oil & gas facility under Permit-to-Work (PTW), Risk Assessment, Toolbox Meeting and QC controls.
- Project works included rainwater interceptor pond deep-cleaning and reinforced-concrete access staircase works.
- Assisted with site surveys, measurements, project documentation, site coordination, site supervision and QC documentation.

Apr 2021 – Mar 2023 Project Engineer

MEGA ACE COMPANY LIMITED — Myanmar

- Delivered and supported 15 rural electrification/electrical distribution projects from tendering and construction through testing, handover and closeout.
- Supervised 11kV/0.4kV distribution systems, pole-mounted transformers, distribution panels and overhead line construction.
- Prepared BOQs, cost estimates, tender/quotation documents, electrical drawings, method statements, progress reports and handover documentation.
- Supervised technician and subcontractor teams and supported installation, testing, commissioning and project coordination.

Mar 2019 – Mar 2021 Site Engineer

MEGA ACE COMPANY LIMITED — Myanmar

- Supported site and route surveys, construction and installation supervision for rural electrification and electrical projects.
- Assisted with BOQ preparation, material calculations, electrical drawings, inspections, testing, commissioning and project handover.
- Supported technician/subcontractor coordination and site documentation.

SELECTED PROJECT EXPERIENCE

Electrical Distribution Project Experience

LOT-42 — Village Electrification / Electrical Distribution

- Lwe Khaw (Inn Thar) Village Electrification Project: 11kV power line — 0.49 miles using SAC 95 mm²; 1 × 50 kVA, 11/0.4kV transformer; 400V power line — 0.59 miles using AAC 95 mm².
- Saungkin Village Electrification Project — NEP Phase II: 400V power line — 0.65 miles using AAC 95 mm²; construction completed.
- Responsibilities included tender documentation, BOQ and cost estimation, site survey, setting out, installation supervision, labour and contractor coordination, testing support and handover.

Solar PV Project Experience

Hands-on experience across approximately 20 small-scale off-grid Solar PV installations. Selected documented project exposure:

- Residential — 7.08 kWp using 12 × 590 W Jinko bifacial modules.
- Restaurant — 7.08 kWp with a 12 kW Growatt inverter and 350 Ah Felicity battery.
- Residential — 7.08 kWp with a 12 kW Gospower inverter and 300 Ah LVTOPSUN battery.
- Fuel Station — 9.44 kWp with a 12 kW Gospower inverter and 350 Ah Felicity battery.
- Seafood Restaurant — 10.62 kWp with two 6 kW Omega inverters in parallel and two 14.35 kWh Omega batteries.

Industrial Site Safety Experience

POSCO International — Shwe Onshore Gas Terminal: Supported rainwater interceptor pond deep-cleaning and reinforced-concrete access staircase works at a live oil & gas facility under PTW, Risk Assessment, Toolbox Meeting and QC controls. This role involved infrastructure support work; it was not an electrical scope.

EDUCATION & TRAINING

Bachelor of Engineering — Electrical Power Engineering — Technological University (Taunggyi), Myanmar · 2018

Bachelor of Technology — Electrical Power Engineering — Technological University (Taunggyi), Myanmar · 2016

Applied Project Management — Myanmar Online School of Technology · 2023

Safety Induction Course — Professional Management Institute · 2023

TECHNICAL TOOLS, LANGUAGES & PROFESSIONAL DEVELOPMENT

Software: AutoCAD 2D — Good; Excel — Good; MS Word — Proficient; MS PowerPoint — Proficient.

Languages: Myanmar (Burmese) — Native; English — Working proficiency for technical documents, site coordination and workplace communication.

Professional Development: PVSyst Training — In Progress.

Additional: Myanmar driving licence; approximately 3 years of car-driving experience. Available to relocate to Singapore for Electrical Site Engineer, Electrical Project Engineer, Testing & Commissioning Engineer, Electrical Maintenance Engineer or Solar PV Site Engineer opportunities.
