Portfolio: khunpholon.github.io/khun-pho-lon-portfolio

PROFESSIONAL SUMMARY

Electrical Site Engineer with 7+ years of experience in building electrical works, M&E coordination, 11kV/0.4kV distribution, Solar PV installation, testing and commissioning, maintenance, documentation and site supervision. Experienced across high-end residential and multi-storey residential/condominium projects, rural electrification and off-grid PV systems. Skilled in BOQs, material quantity calculations, AutoCAD 2D drawings, inspections and coordination with multidisciplinary site teams. Seeking an Electrical Site Engineer, Electrical Project Engineer M&E Engineer or Solar PV Engineer opportunity in Singapore.

CORE COMPETENCIES

Building Electrical / M&E · 11kV / 0.4kV Distribution · Solar PV Systems · Testing & Commissioning
BOQ / Cost Estimation · Site & Subcontractor Supervision · AutoCAD 2D · M&E Interface Coordination

PROFESSIONAL EXPERIENCE

Electrical Engineer | MEGA UNIQUE COMPANY LIMITED, Myanmar Aug 2023 – May 2026

- Executed electrical installation works for high-end residential and multi-storey residential/condominium projects, including wiring, conduits, DB/panel installation, lighting, socket-outlets and earthing systems.
- Prepared BOQs, material quantity calculations and material requisitions for cables, conduits, distribution boards, circuit breakers and accessories.
- Performed insulation-resistance, continuity, earth-resistance and functional testing; supported inspections, quality checks and commissioning.
- Prepared AutoCAD 2D M&E shop and as-built drawings, progress documentation and site records.
- Coordinated with ACMV, plumbing/water-supply and fire-protection teams during installation works to resolve site interfaces and avoid clashes with electrical services; observed and supported their installation and inspection activities.
- Installed and maintained small-scale off-grid Solar PV systems, including modules, inverters, batteries, DC/AC cabling, commissioning, troubleshooting and maintenance.
- Supported site supervision, technician/subcontractor coordination, material planning, quality checks and safety requirements.

Engineer | COMET M&E COMPANY LIMITED, Myanmar Apr 2023 – Jul 2023

Project: POSCO International – Shwe Onshore Gas Terminal

- Supported senior engineers on infrastructure works at a live oil & gas facility under Permit-to-Work, Risk Assessment, Toolbox Meeting and QC controls.
- Assisted with surveys, measurements, method statements, drawings, progress documentation, material coordination, site supervision and QC documentation. This role involved infrastructure support work and was not an electrical scope.

Project Engineer | MEGA ACE COMPANY LIMITED, Myanmar Apr 2021 – Mar 2023

- Worked on and supported 15 government-funded rural electrification and electrical distribution projects from tendering through construction, testing, handover and project closeout.
- Supported the installation of 9 pole-mounted transformers (50–200 kVA, 11/0.4 kV), 9 distribution panels, approximately 48 km of overhead 11 kV distribution lines and 30 km of overhead 0.4 kV distribution lines.
- repared BOQs, cost estimates, tender/quotation documents, electrical drawings, method statements, progress reports and handover documentation.
- Supervised teams of approximately 10–15 technicians and subcontractors, coordinating daily site activities and installation work.
- Conducted site and route surveys, coordinated construction activities, and supported inspection, testing and commissioning with government-appointed QC teams and relevant authorities.

Site Engineer | MEGA ACE COMPANY LIMITED, Myanmar Mar 2019 – Mar 2021

- Supported site and route surveys, construction and installation supervision for rural electrification and electrical projects.
- Assisted with BOQs, material calculations, electrical drawings, inspections, testing, commissioning and project handover.

SELECTED PROJECT EXPERIENCE

Solar PV Project Experience: Selected documented small-scale off-grid Solar PV installations for residential and commercial applications, including 7.08 kWp, 9.44 kWp and 10.62 kWp systems. Installation, DC/AC wiring, commissioning, troubleshooting and maintenance.

Electrical Distribution / Rural Electrification: Lwe Khaw (Inn Thar) Village – 11 kV line (0.49 miles, SAC 95 mm²), 50 kVA 11/0.4 kV transformer, 400 V line (0.59 miles, AAC 95 mm²). Saungkyin Village (NEP Phase II) – 400 V line (0.65 miles, AAC 95 mm²); construction completed.

TECHNICAL SKILLS

Electrical: 11kV/0.4kV distribution, transformers, MDB/DB, circuit breakers, earthing, lighting and power systems

Solar PV: PV modules, inverters, batteries, string connections, DC/AC cabling, testing, commissioning, troubleshooting and maintenance

Testing: Insulation resistance, continuity, earth-resistance and functional testing; multimeter and clamp meter

Engineering: BOQ preparation, cost estimation, material calculations, AutoCAD 2D, as-built drawings, method statements, progress documentation

Software: AutoCAD 2D (Good), QGIS (Good), Google Earth Pro (Good), Microsoft Excel (Good), Word & PowerPoint (Proficient), PVSyst (currently learning)

EDUCATION & TRAINING

Bachelor of Engineering – Electrical Power, Technological University (Taunggyi), Myanmar | 2018

Bachelor of Technology – Electrical Power Engineering, Technological University (Taunggyi), Myanmar | 2016

- Applied Project Management, Myanmar Online School of Technology | 2023
- Safety Induction Course, Professional Management Institute | 2023

LANGUAGES

Myanmar (Burmese) – Native

Pa-O – Native

English – Intermediate speaking; good reading and writing

ADDITIONAL INFORMATION

Driving: Myanmar driving licence; 3 years of car-driving experience
